The Blackburn Press, United States, 2002. Paperback. Book Condition: New. 256 x 175 mm. Language: English . Brand New Book ***** Print on Demand *****.Many people are frustrated by their inability to determine the identity of a woody plant growing in their backyards, neighborhood parks, along a roadside or at a vacation site. Woody Plants for the Central and Northern Prairies attempts to assist them by providing descriptions and sketches of most of the native and exotic plants that they are likely to find or wish to grow. This book includes line drawn illustrations for ease of identification. The authors decided that in promoting sustainable landscapes, they should include both native and exotic woody plants adapted to a portion of the Great Plains. Since many of the plants described are native or adapted to other regions of the temperate zone, Woody Plants for the Central and Northern Prairies will be a useful reference well beyond the confines of the central and northern prairies of North America. The book will be an excellent basic reference for interested laypersons and teachers as well as professionals. It attempts to provide factual information to professional and amateur horticulturalists, landscape designers, foresters, students, farmers and urban dwellers in the heartland of the United States. Plants in the book can be identified by simple grouping charts and without the use of tedious keys. They are presented in related phylogenetic groups (orders, families, genera, species) based on a modern theory of evolution. Species are arranged in sequence, beginning with gymnosperms (Pinophyta), the most primitive and progressing through the dicots (Magnoliopsida) and the monocots (Liliopsida) of the angiosperms (Magnoliophyta). The angiosperms are arranged in a sequence based on one of the latest theories of plant evolution (Cronquist 1981) a theory which deviates considerably from that of Rehder (1940)...
