Wildside Press, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Rothman s novel is filled with scientific discussions on everything from the equipment used to the different types of fusion, like cold or laser, complete with corresponding jargon. But Rothman turns all of it, even a convoluted conspiracy, into a diverting, worthwhile story. Intelligent in its technical details, but also refined and delightfully complex in its storytelling. -- Kirkus The world is moving towards alternative energy. Two giant laboratories, one in France, one in Texas, are engaged in a contest to give mankind a limitless source of energy-fusion, the energy source of stars. In France, the European Union is constructing the colossal ITER project. At CFRC, the Controlled Fusion Research Center near Austin, a scientists have constructed a machine they call Prometheus to challenge ITER. When the director of the Austin lab attempts to achieve fusion on the day of Prometheus dedication, a near-fatal accident ensues, and in an instant the rivalry between ITER and CFRC becomes a race to change the future of the world. But was it an accident, or sabotage? Prominent physicist and writer Tony Rothman, PhD, uses his technical expertise to create a rare and timely novel based on genuine science. Not science fiction, the science of Firebird is as real as the collision between science and politics it portrays. Rothman, who has taught physics at Princeton and Harvard Universities, is the author of eleven books. He has won numerous writing awards and has been nominated for the Pulitzer Prize.
